Research and Projects

Archi - A RLHF-powered Flowchart Generation System Final Year Project Mesop, Gemini API, Mermaid.js, GraphViz
- Developed an AI-augmented system for automated flowchart generation preserving details across iterations. - Generation is split into a three-phase validation pipeline with efficiency in computation and energy. - Research Paper in Progress - Exploring Computational Efficiency through Staged Validation.
Agriguru Infosys Global Hackathon - Tech for Good 2025 Winner Flutter, Firebase, Gemini API, Google Cloud
- Designed a voice-first, multilingual tool for rural farmers to boost yield using Gemini API and Google Cloud. - Optimized for legacy hardware and low-connectivity zones.
Āraycci - RAG Research Assistant Llama 3, Python
- Developed a RAG powered research assistant using Llama 3 for intelligent literature search and contextual Q&A. - Automated retrieval and summarization of academic papers, reducing manual research time for scholars and enabling cross-language translation support.
Kalaikatha - AI-Powered Marketplace Assistant for Indian Artisans Google GenAI Challenge'25 React, Gemini API, GCP
Enhanced artisans' digital presence, customer engagement and sales through a voice-first, multilingual assistant handling marketing and business.

Skills

Programming Languages	Python, HTML, CSS, ReactJS, JavaScript, R, SQL, C, C++, Java
Developer and Design Tools	Canva, Figma, Aseprite, Unity Engine, Blender, Lovable AI
Productivity and Cloud	MS Office 365, Google Workspace, Notion, Slack, VS Code, Google Cloud
AI and Research Tools	Prompt Engineering, Github Copilot, Gemini, Claude AI, n8n, Hugging Face, RAG
Soft Skills	Leadership, Communication, Creativity, Collaboration
Languages	English, Hindi, Tamil, Kannada, Tulu
